**IMSA GT3 Cup Challenge Presented by Michelin
Bulletin GT3 06-06**

To: All GT3 Participants

From: Kirt Wightman, Series Administrator

Date: August 23, 2006

-
- Effective immediately, the minimum weight of a car without and with driver must be 1200 kg and 1300 kg respectively at all times during the event. This requirement supercedes technical regulations 11.15.1 and 11.15.2.

11.15.3 - Any ballast must be carried in a ballast box* constructed of steel with a minimum thickness of .100 and utilize the passenger seat mounts for anchoring. The box must fully enclose the ballast, which must also be secured inside the ballast box. This is the only authorized location for ballast. Driver comfort systems must be placed in close proximity to the ballast area.

- The numbers for the rear bumper that were given out at Road America will be provided the first time and when they need to be replaced each team/driver will be responsible for the replacement of same. (The numbers are 5.9" Swiss 721Blkcn – solid black numbers outlined in white)
- *Note: Several teams have offered to fabricate ballast boxes as a convenience to other competitors. Please contact Kirt Wightman at (770) 601-7833 or imsagt3cup@bellsouth.net for the information.
