## IMSA COMPETITION MEMO # ALMS 09-06

To: All American Le Mans Series Entrants  
From: Scot E Elkins, VP Technical Operations  
Date: 4 February 2009  
Re: Clarification on Fuel Probe Sensors

---

In regards to ACO Technical Regulation 6.3.3, for all classes:

**Must be equipped with a sensor that prevents the engine from starting when the fuel tank filler and vent are connected. This recommended system must be approved by the ACO.**

Please note that this sensor is recommended and not mandatory for all classes.
