IMSA MEMO # 09-16

To: All American Le Mans Series Entrants

From: Scot E Elkins, VP Operations

Date: 2 September 2009

Re: GT2 Scrutineering Reminder

For Post-Qualifying and Post-Race Scrutineering, ride height, wing height, and pertinent body work measurements will be taken with all tires inflated to 30 psi.

Teams are required to have inflation equipment present to facilitate the above operation.
