IMSA COMPETITION BULLETIN #09-11

To: All American Le Mans Series Entrants

From: Scot E Elkins, VP Technical Operations

Date: 24 April 2009

Re: Class Adjustments

In accordance with Attachment 2 of the American Le Mans Series SSR, the following adjustments are made to the indicated cars:

“LM” P2:

1. 2 liter L4 turbocharged engines may compete with the current One (1) air restrictor with a maximum inside diameter of 45 mm and with a maximum manifold pressure of 2300 mbar until 27 June 2009.

“LM” GT2:

1. BMW E92 M3: ACO Specifications but at a Minimum weight of 1245kg and Two (2) air restrictors with a maximum diameter of 29.4 mm.
2. Panoz GTLM: Minimum weight of 1245kg and Two (2) air restrictors with a maximum diameter of 29.8 mm.
